

ROADCEM HRB E3

Characteristics

Product type:	Hydraulic Road Binder. Minimum compressive strength 22.5 MPa (N/mm ²)
Conformity:	Manufactured to the requirements of BS EN 13282-1
Constituents:	Clinker and Pozzolana
Technical name:	Hydraulic Road Binder HRB E3
Packaging:	50kg bag, 1 ton jumbo bag, bulk cement

Applications

Roadcem is designed to provide optimal solutions for improving the engineering properties of soil:

- Strength and bearing capacity are increased
- Better volume stability by controlling swell and shrinkage - Better durability
- Modification of clay minerals enhances soil strength and bearing capacity

Ideal for

- Stabilization of road base, sub base and sub grade materials and embankments
- Soils with either low or moderate plasticity
- In situ stabilization or pugmill blending
